CHANGE YOUR PERSPECTIVE!

Return children to society well - equipped with the strategies to succeed; combined with the belief and experience that they can and they will.

Managed Education, INC.

OUR MANAGED EDUCATION PROGRAM

Our Managed Education Program (MEP) is a program of Guardian Watch, Inc., our non-profit 501(c)3. Conceptualized with unique components, MEP is framed by a scientific approach that includes social psychology and resiliency theory.

Our program is framed by an intentional focus on the academic, as well as the affective aspects of the child.

While we assist students with current academic tasks, we deliberately assess the academic deficiencies of each student and support their mastery of those skills. Additionally, we heavily focus on the social and emotional wellbeing of each student through a series of open ended and individual tasks.

Our counselors are State Certified Educators or equivalent with advanced training in their area of specialty and Jessica Lunsford - Level 2 background certified.
